

Protecting Land. Preserving Legacy. 2025 Annual Impact Report

Dear Friends,

This year, Maplewood Trust completed one of our most significant conservation projects to date: the permanent protection of 233 acres of forestland at Hemlock Ridge. This property—with its mature forest, headwater streams, and critical wildlife habitat—was threatened with subdivision. **Today, with your help, it is conserved forever.**

This work is only possible because of you. Whether you donated, volunteered at a trail work party, or joined us at Party at Painted Rock, you are part of what makes this work endure.

Thank you for your trust, your generosity, and your commitment to the land.

With gratitude,

Sarah Chen
Executive Director

“Water is a finite source.”

In 2025, we partnered with the Beaver Institute to develop a strategic plan to protect beaver habitat and our future.

233

Acres of forestland **permanently protected** this year—ensuring wildlife habitat and public access **for generations to come.**

62

Public preserves open for hiking, birding, and exploration
